PROJECTS

Online Cake Shop – E-Commerce Website

Created a captivating e-commerce platform for a bespoke cake shop, where customers can effortlessly personalize every detail of their dream dessert, from flavor profiles to size and icing, complemented by seamless order tracking and authentic customer reviews

Indo Plant – Smart Plant Care & E-Commerce Website

Developed a modern and responsive plant e-commerce website with smart plant care guidance and interactive shopping features. The platform provides customized care instructions based on plant placement, including watering and care requirements, while allowing users to browse products, add plants to the cart, and automatically calculate the total purchase amount.

Online Flower Shop – E-Commerce Web Application

Developed a modern and responsive e-commerce web application for an online flower shop, featuring secure form validation, automatic invoice generation, order date selection, customer ordering functionality, and personalized flower recommendations based on special occasions. Users can explore detailed flower information and place orders through an interactive and user-friendly interface.
